business@harveytucker.com

Dedicated and hardworking 4th year Computer Science student with a passion for software engineering and game development. Experienced in a wide range of programming languages and computing techniques which I have used both in my studies and free time. Looking forward to working in a professional environment in order to grow my knowledge and gain experience.

Education

University of Nottingham: October 2023 - Present
MSci Computer Science
Average grade: 68.06% (II-1)
Favourite Modules: Computer Graphics, Compilers, Cryptography
Peter Symonds College: September 2021 - June 2023
A-Levels
Computer Science (A), Geography (A), Statistics (A)

Technical Experience

Programming Languages

I have prior knowledge and have completed both personal and university projects using a number of languages:

- HTML/CSS
- JavaScript
- C
- C++
- C#
- Java
- Python
- ARM Assembly
- SQL
- GLSL

Unity Game Development

- Worked on a range of projects in the Unity game engine using C#
- Created both 2D and 3D environments as part of game development and simulation projects
- Gained a basic knowledge of 3D modelling in Blender
- Placed highly in an online indie game jam by creating a 2D platformer
- Actively completing a dissertation project based in Unity

Second Year Software Engineering Group Project

- Worked in a team to build an android application under contract from an external company
- Gained practical experience of Agile workflows and worked within a bi-weekly sprint schedule
- Maintained a dynamic git repo with multiple users, branch management and version control
- Created industry level documentation with well defined user requirements and specification

Homelab Docker Management

- Utilised Docker Compose scripts to manage a local homelab with multiple deployed containers
- Installed a system using nginx Proxy Manager to ensure the security of the network
- Worked with multiple docker frontends including Docker CLI, Dockhand and Portainer

Hackathon Participation

- Took part in HackNotts multiple times and created projects in a team with my peers
- Won “Best First Time Hack” during one event for creating an esoteric programming language
- Made projects involving web extension development, turing machines and interpreters

Previous Work

Popham Airfield Cafe

October 2020 - September 2026

- Worked in a team environment where effective communication is key
- Suporvised junior team members and aided in training new staff in all areas of the job
